- Spend time outdoors to build observation skills, curiosity, and wonder.
- Learn science and math to support planning, logistics, and budgeting.
- Develop computer science skills for organizing and managing programs.
- Teach in classrooms to understand and support teachers' real needs.
- Build graphic design skills to create engaging educational materials.
- Learn multimedia tools to communicate science through videos and projects.

## Education Coordinator

### What do they do?

An Education Coordinator supports the development and delivery of educational programs that help students understand important topics and connect learning to real-world issues. The role focuses on creating engaging, age-appropriate learning experiences for students across multiple grade levels, with an emphasis on building awareness, responsibility, and practical understanding. Typical responsibilities include coordinating curriculum development, collaborating with educators, organizing interactive learning opportunities such as classroom activities, field experiences, and tours, and overseeing educational presenters or facilitators. The role often blends in-person and digital learning by supporting online content, instructional materials, and virtual experiences that expand access to education beyond the classroom.

### Is this a good career for me?

Education Coordinators often have:

- Strong observational skills grounded in curiosity
- Literacy in science, mathematics, and technology
- Creative and effective communication skills
- A passion for collaborative teamwork
- Strong problem-solving and decision-making abilities
- A commitment to lifelong learning
